

# EXTREME SOUND SYSTEM – Data sheet

The new **EXTREME Sound System** is the most humane and environmentally friendly way of keeping roosting / nesting PIGEONS away from unwanted areas.

## Technical information of the Extreme Sound System:

The **EXTREME Sound System** projects 130 dB at a frequency range between 16,000 Hz - 23,000 Hz. Combined with variable sound waves, intruding pigeons will not get used to the sounds emitted by the **EXTREME Sound System**. **The removal of any visible nests is of utmost importance.**

The **Eagle Eye EXTREME Sound System** protects an unobstructed area of approximately 150 square meters in a fan shape, with a radius of about 15 – 10 meters in a 90 degree arc.

The sound emitted cannot be heard by humans but is an irritation to **Pigeons**.

## Installation instructions:

1. Mount the unit in a direct line to your problem area.
2. Connect the extension cord and adapter with the main unit. (9V)
3. After plugging in the adaptor, the red LED will be on to indicate that the **Extreme Sound System** is operating properly.

## PLEASE NOTE:

Any obstacles in front of the **EXTREME Sound System** will limit the effects of the sound waves. Do not modify or tamper with the unit's internal components. Covering or painting over the speaker can damage the device and cause it to malfunction. Competitive noise will limit the effectiveness of the unit.

## Outdoor use:

The Extreme sound system can be used outdoors if installed upright with the power plug facing downward.

## Guarantee:

The Extreme sound system carries a two year guarantee from the date of purchase.

***Opening up or tampering with the device will void the guarantee.***

Dimensions: 138 x 115 x 76 mm

Weight: 316 g (excluding adapter & extension cord)

Power supply: 220-240 VAC, 50/60 cycles, 110-120 VAC, 50/60 cycles

Power consumption: 1 'A watts

Frequency range: 16,000 Hz to 23,000 Hz (continuously variable)

Output consumption: 130 dB
