

Solar Panel Clip

*Always follow all safety rules
when operating power tools and
working at heights.*

*Do not perform the
installation process without
the necessary safety qualifications.*

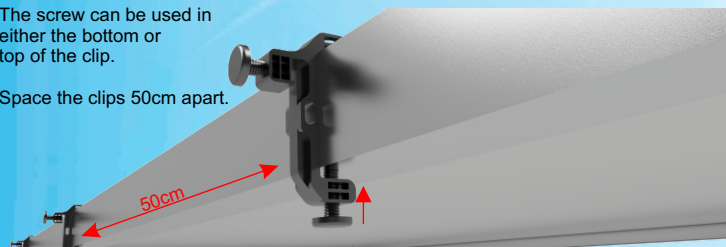

Undo the bottom screw and
place the clip over the frame
of the solar panel.

The clip will fit panels with a
thickness of up to 37mm.

Fasten the bottom screw to secure
the clip to the panel.

The screw can be used in
either the bottom or
top of the clip.

Space the clips 50cm apart.

Cut the mesh to size and insert the top edge of the mesh into the "arm" of the clip.
Fasten the side-screw to secure the mesh into the clip.

The hole on the side of the clip can also be used to secure the mesh with a Cable Tie.
